Volume 156 1986

Table of contents

No. 1 1–220 issued on April 1, 1986
No. 2 221–440 issued on April 15, 1986
No. 3 441–684 issued on May 2, 1986

Nucleic acids, protein synthesis, and molecular genetics

Molecular cloning of cDNA for rat mitochondrial 3-hydroxyacyl-CoA dehydrogenase
Y. Amaya, M. Takiguchi, T. Hashimoto and M. Mori 9–14

Cross-linking of elongation factor 2 to rat-liver ribosomal proteins by 2-iminothiolane
T. Uchiumi, M. Kikuchi, K. Terao, K. Iwasaki and K. Ogata 37–48

Differences in DNase I sensitivity and methylation within the human β-globin gene domain and correlation with expression
C. Arapinis, J. Elion, D. Labie and R. Krishnamoorthy 123–129

Cloning and nucleotide sequence of a cDNA encoding the precursor of the barley toxin α-hordothionin
F. Ponz, J. Paz-Ares, C. Hernández-Lucas, F. García-Olmedo and P. Carbonero 131–135

Structure and expression of mouse aldolase genes – Brain-specific aldolase C amino acid sequence is closely related to aldolase A
G. Paolella, P. Buono, F. P. Mancini, P. Izzo and F. Salvatore 229–235

Nucleotide sequence of the bacteriophage T5 DNA fragment which contains the gene for $tRNA^{Asp}$
M. G. Shlyapnikov, V. N. Ksenzenko, V. M. Kryukov and A. A. Bayev 285–289

Different micrococcal nuclease cleavage patterns characterize transcriptionally active and inactive sea-urchin histone genes
L. Anello, I. Albanese, C. Casano, F. Palla, F. Gianguzza, M. G. Di Bernardo, R. Di Marzo and G. Spinelli 367–374

Expression of polyoma virus middle-T antigen in *Saccharomyces cerevisiae*
G. J. Belsham, D. G. Barker and A. E. Smith 413–421

Sequence of the *Citrobacter freundii* OS60 chromosomal *ampC* β-lactamase gene
F. Lindberg and S. Normark 441–445

Rat liver and intestinal mucosa differ in the developmental pattern and hormonal regulation of carbamoyl-phosphate synthetase I and ornithine carbamoyl transferase gene expression
J. C. Ryall, M. A. Quantz and G. C. Shore 453–458

Studies of tobacco mosaic virus reassembly with an RNA tail blocked by a hybridised and cross-linked probe
L. Fairall, J. T. Finch, C.-F. Hui, C. R. Cantor and P. J. G. Butler 459–465

Localization of L11 on the *Escherichia coli* ribosome by singlet-singlet energy transfer
H.-Y. Deng, O. W. Odom and B. Hardesty 497–503

The increase by spermidine of fidelity of protamine synthesis in a wheat-germ cell-free system
K. Ito and K. Igarashi 505–510

The nucleotide sequence of the *HEM1* gene and evidence for a precursor form of the mitochondrial 5-aminolevulinate synthase in *Saccharomyces cerevisiae*
D. Urban-Grimal, C. Volland, T. Garnier, P. Dehoux and R. Labbe-Bois 511–519

Staphylococcal protein A consists of five IgG-binding domains
T. Moks, L. Abrahmsén, B. Nilsson, U. Hellman, J. Sjöquist and M. Uhlén 637–643

Primary structures of mutationally altered ribosomal protein L7/L12 and their effects on cellular growth and translational accuracy
L. A. Kirsebom, R. Amons and L. A. Isaksson 669–675

Protein chemistry and structure

Human sperm protamines – Amino-acid sequences of two forms of protamine P2
D. J. McKay, B. S. Renaux and G. H. Dixon 5–8

Pyruvate carboxylase from *Saccharomyces cerevisiae* – Quaternary structure, effects of allosteric ligands and binding of avidin
M. Rohde, F. Lim and J. C. Wallace 15–22

Human complement component $C\bar{1}s$ – Partial sequence determination of the heavy chain and identification of the peptide bond cleaved during activation
S. E. Spycher, H. Nick and E. E. Rickli 49–57

Isolation and primary structure of novel neurointermediate pituitary peptides derived from the C-terminal of the rat vasopressin-neurophysin precursor (propressophysin)
J. P. H. Burbach, N. G. Seidah and M. Chrétien 137–142

Structuring of H1 histone – Evidence of high-affinity binding sites for phosphate ions
L. De Petrocellis, G. Quagliarotti, L. Tomei and G. Geraci 143–148

Autolysis of thermolysin – Isolation and characterization of a folded three-fragment complex
G. Fassina, C. Vita, D. Dalzoppo, M. Zamai, M. Zambonin and A. Fontana 221–228

Comparison of myosins from the masseter muscle of adult rat, mouse and guinea-pig – Persistence of neonatal-type isoforms in the murine muscle
A. d'Albis, C. Janmot and J.-J. Bechet 291–296

Separation of tryptophan pyrrolooxygenase into three molecular forms – A study of their substrate specificities using tryptophyl-containing peptides and proteins
B. Camoretti-Mercado and R. B. Frydman 317–325

Purification and characterization of a novel, oligomeric, plasminogen kringle 4 binding protein from human plasma: tetranectin
I. Clemmensen, L. C. Petersen and C. Kluft 327–333

Cytosolic rat liver glutathione transferase 4-4 – Primary structure of the protein reveals extensive differences between homologous glutathione transferases of classes *Alpha* and *Mu*
P. Ålin, B. Mannervik and H. Jörnvall 343–350

Characterization and structural aspects of the enhanced assembly of tubulin after removal of its carboxyl-terminal domain
R. B. Maccioni, L. Serrano, J. Avila and J. R. Cann 375–381

Photoaffinity labelling of gizzard myosin with 3′-*O*-(4-benzoyl)-benzoic-adenosine 5′-triphosphate
S. Srivastava, M. B. Cable and S. P. Driska 447–451

Purification and structural characterization of intact and fragmented nidogen obtained from a tumor basement membrane
M. Paulsson, R. Deutzmann, M. Dziadek, H. Nowack, R. Timpl, S. Weber and J. Engel 467–478

Separation and identification of the major constituents of cytoplasmic gels from macrophages
M. Pacaud 521–530

Specificity of *Bacillus thuringiensis* var. *colmeri* insecticidal δ-endotoxin is determined by differential proteolytic processing of the protoxin by larval gut proteases
M. Z. Haider, B. H. Knowles and D. J. Ellar 531–540

Haem localization in haemoproteins by spin and triplet tools
Y. Yudanova, V. Meckler, V. Fogel, A. Kulikov, A. Kotelnikov, G. Likhtenstein, M. Berkovich, A. Karyakin, A. Archakov, A. Kaplun and V. Schvets 541–544

S protein modulates the heparin-catalyzed inhibition of thrombin by antithrombin III – Evidence for a direct interaction of S protein with heparin
K. T. Preissner and G. Müller-Berghaus 645–650

Enzymology

Formaldehyde dismutase, a novel NAD-binding oxidoreductase from *Pseudomonas putida* F61
N. Kato, T. Yamagami, M. Shimao and C. Sakazawa 59– 64

Substrate specificities and inhibition of two hemorrhagic zinc proteases Ht-c and Ht-d from *Crotalus atrox* venom
J. W. Fox, R. Campbell, L. Beggerly and J. B. Bjarnason 65– 72

Assay of mannose-6-phosphatase in untreated and detergent-disrupted rat-liver microsomes for assessment of integrity of microsomal preparations
F. Vanstapel, K. Pua and N. Blanckaert 73– 77

Studies on naturally occurring proteinous inhibitor for transmethylation reactions
S.-Y. Hong, H. W. Lee, S. Desi, S. Kim and W. K. Paik 79– 84

Isolation and properties of an H_2O-forming NADH oxidase from *Streptococcus faecalis*
H.-L. Schmidt, W. Stöcklein, J. Danzer, P. Kirch and B. Limbach 149–155

Kinetic analysis of the reaction mechanism of oxaloacetate decarboxylase from *Klebsiella aerogenes*
P. Dimroth and A. Thomer 157–162

The initiation of glycogen biosynthesis in rat heart α-1,4 glucans tightly associated with glycogen synthase
M. L. Blumenfeld and C. R. Krisman 163–169

Methane formation from methyl-coenzyme M in a system containing methyl-coenzyme M reductase, component B and reduced cobalamin
D. Ankel-Fuchs and R. K. Thauer 171–177

The chemical and enzymatic oxidation of hematohemin IX – Identification of hematobiliverdin IXα as the sole product of the enzymatic oxidation
G. Buldain, R. B. Frydman, M. L. Tomaro and B. Frydman 179–184

Characterisation of RNA polymerase activity in yeast mitochondria
R. Docherty and D. Rickwood 185–188

Active-site ionizations of papain – An evaluation of the potentiometric difference titration method
M. Migliorini and D. J. Creighton 189–192

Purification and reconstitution properties of human placental aromatase – A cytochrome P-450-type monooxygenase
L. Tan and N. Muto 243–250

Substrate stereochemistry of the biotin-dependent sodium pump glutaconyl-CoA decarboxylase from *Acidaminococcus fermentans*
W. Buckel 259–263

Inhibition of yeast cytosine deaminase by 5-bromo-2-pyrimidinone and its covalent hydrate
M. J. Kornblatt and O. S. Tee 297–300

On the steric course of the adenosylcobal-amin-dependent 2-methyleneglutarate mutase reaction in *Clostridium barkeri*
G. Hartrampf and W. Buckel 301–304

Human gastric lipase – The effect of amphiphiles
Y. Gargouri, G. Pieroni, P. A. Lowe, L. Sarda and R. Verger 305–310

Study on the initial kinetics of yeast phosphofructokinase by stopped-flow measurements
J. Bär, G. Hübner and G. Kopperschläger 311–315

Activation of bovine muscle carbonic anhydrase by modification of thiol groups
P. Engberg and S. Lindskog 407–412

Characterisation of two forms of phosphoribulokinase isolated from the green alga, *Scenedesmus obliquus*
J. J. Lazaro, C. W. Sutton, S. Nicholson and R. Powls 423–429

Rapid-scan stopped-flow studies of the pH dependence of the reaction between mercuric reductase and NADPH
L. Sahlman, A.-M. Lambeir and S. Lindskog 479–488

On the mechanism of action of methylmalonyl-CoA mutase – Change of the steric course on isotope substitution
K. Wölfle, M. Michenfelder, A. König, W. E. Hull and J. Rétey 545–554

Kinetic studies of 6-phosphogluconate dehydrogenase from sheep liver
C. M. Topham, B. Matthews and K. Dalziel 555–567

Purification and characterization of (2*S*)-flavanone 3-hydroxylase from *Petunia hybrida*
L. Britsch and H. Grisebach 569–577

Purification and properties of coproporphyrinogen oxidase from the yeast *Saccharomyces cerevisiae*
J.-M. Camadro, H. Chambon, J. Jolles and P. Labbe 579–587

4-Aminobutyrate:2-oxoglutarate aminotransferase from *Candida* – Purification and properties
P. A. Der Garabedian, A.-M. Lotti and J. J. Vermeersch 589–596

Carbohydrates, lipids and other natural products

Hyperchromic effect of collagen induced by human collagenase
S. Lindy, T. Sorsa, K. Suomalainen, A. Lauhio and H. Turto 1– 4

Structural studies on O-specific polysaccharides of lipopolysaccharides from *Yersinia enterocolitica* serovars O:5 and O:5,27
R. P. Gorshkova, E. N. Kalmykova, V. V. Isakov and Y. S. Ovodov 391–397

Structure of the O-specific polysaccharide from the lipopolysaccharide of *Serratia marcescens* O8
D. Oxley and S. G. Wilkinson 597–601

Structural studies of the carbohydrate chains of human γ-interferon
J. H. G. M. Mutsaers, J. P. Kamerling, R. Devos, Y. Guisez, W. Fiers and J. F. G. Vliegenthart 651–654

Physical biochemistry

Persistence of cruciform structure and preferential location of nucleosomes on some regions of pBR322 and ColE1 DNAs
E. Caffarelli, L. Leoni, B. Sampaolese and M. Savino 335–342

Complement deposition from human sera on silicon surfaces studied *in situ* by ellipsometry – The influence of surface wettability
H. Elwing, B. Ivarsson and I. Lundström 359–365

Deuterium incorporation into *Escherichia coli* proteins – A neutron-scattering study of DNA-dependent RNA polymerase
H. Lederer, R. P. May, J. K. Kjems, W. Schaefer, H. L. Crespi and H. Heumann 655–659

Membranes and bioenergetics

Selective acylation of membrane proteins in *Acholeplasma laidlawii*
S. Nyström, K.-E. Johansson and Å. Wieslander 85– 94

Purification and characterization of Ca^{2+}/H^+ antiporter from *Bacillus subtilis*
T. Matsushita, T. Ueda and I. Kusaka 95–100

Respiration of *Trichomonas vaginalis* – Components detected by electron paramagnetic resonance spectroscopy
A. Chapman, R. Cammack, D. J. Linstead and D. Lloyd 193–198

Tissue-specific and species-specific distribution of –SH groups in cytochrome *c* oxidase subunits
A. Stroh and B. Kadenbach 199–204

The sodium pump glutaconyl-CoA decarboxylase from *Acidaminococcus fermentans* – Specific cleavage by *n*-alkanols
W. Buckel and H. Liedtke 251–257

Purification and properties of membrane-bound hydrogenase isoenzyme 1 from anaerobically grown *Escherichia coli* K12
R. G. Sawers and D. H. Boxer 265–275

Isolation and characterisation of a soluble active fragment of hydrogenase isoenzyme 2 from the membranes of anaerobically grown *Escherichia coli*
S. P. Ballantine and D. H. Boxer 277–284

Phosphorylation of lens intrinsic membrane proteins by protein kinase C
P. D. Lampe, M. D. Bazzi, G. L. Nelsestuen and R. G. Johnson 351–357

^{31}P-NMR investigation of magnetically oriented rod outer segments – Spectral analysis and identification of individual phospholipids
L. C. P. J. Mollevanger, E. A. Dratz, B. De Kruijff, C. W. Hilbers and W. J. De Grip 383–390

Galactose- and maltose-stimulated lipoamide dehydrogenase activities related to the binding-protein-dependent transport of galactose and maltose in toluenized cells of *Escherichia coli*
G. Richarme and H.-G. Heine 399–405

Measurements of the proton motive force generated by cytochrome *c* oxidase from *Bacillus subtilis* in proteoliposomes and membrane vesicles
W. de Vrij, A. J. M. Driessen, K. J. Hellingwerf and W. N. Konings 431–440

Two acceptor sub-types for dendrotoxin in chick synaptic membranes distinguishable by β-bungarotoxin
A. R. Black and J. O. Dolly 609–617

Cardiac sarcoplasmic reticulum contains a low-affinity site for phenylalkylamines
H.-J. Oeken, E. von Nettelbladt, M. Zimmer, V. Flockerzi, P. Ruth and F. Hofmann 661–667

Cellular biochemistry and metabolism

Characterization of microtubule-associated proteins isolated from bovine adrenal gland
S. Kotani, H. Murofushi, S. Maekawa, C. Sato and H. Sakai 23– 29

Restoration of the polyamine contents in rat hepatoma tissue-culture cells after inhibition of polyamine biosynthesis – Relationship with cell proliferation
E. W. Gerner and P. S. Mamont 31– 35

The protein phosphatases involved in cellular regulation – Evidence that dephosphorylation of glycogen phosphorylase and glycogen synthase in the glycogen and microsomal fractions of rat liver are catalysed by the same enzyme: protein phosphatase-1
S. Alemany, S. Pelech, C. H. Brierley and P. Cohen 101–110

Labelling of chlorophylls and precursors by [2-^{14}C]glycine and 2-[1-^{14}C]oxoglutarate in *Rhodopseudomonas spheroides* and *Zea mays* – Resolution of the C_5 and Shemin pathways of 5-aminolaevulinate biosynthesis by thin-layer radiochromatography
R. J. Porra 111–121

Low apparent affinity for low-density lipoprotein of receptors expressed by human macrophages maintained with whole serum
B. L. Knight and A. K. Soutar 205–210

Acute *in vivo* stimulation of low-K_m cyclic AMP phosphodiesterase activity by insulin in rat-liver Golgi fractions
C. Benelli, B. Desbuquois and B. De Gallé 211–220

Characterization of the DNA-binding properties of the receptor for 2,3,7,8-tetrachlorodibenzo-*p*-dioxin
R. R. Hannah, J. Lund, L. Poellinger, M. Gillner and J.-Å. Gustafsson 237–242

Isolation and localization of filamin in heart muscle
V. E. Koteliansky, M. A. Glukhova, G. N. Gneushev, J.-L. Samuel and L. Rappaport 619–623

^{31}P-nuclear-magnetic-resonance study of muscles from *Mytilus edulis*
A. Schanck, B. Verbaert, M. Van Meersche, F. Baguet and J. Devroede 625–629

Cycle of the vasoactive intestinal peptide and its binding site in a human adenocarcinoma cell line (HT 29)
J. Luis, J.-M. Muller, B. Abadie, J.-M. Martin, J. Marvaldi and J. Pichon 631–636

Nucleotide exchange between cytosolic ATP and F-actin-bound ADP may be a major energy-utilizing process in unstimulated platelets
J. L. Daniel, I. R. Molish, L. Robkin and H. Holmsen 677–684

Developmental biochemistry and immunology

Immunochemical quantification of sarcoplasmic reticulum Ca-ATPase, of calsequestrin and of parvalbumin in rabbit skeletal muscles of defined fiber composition
E. Leberer and D. Pette 489–496

Evidence that the development of hepatic fatty acid oxidation at birth in the rat is concomitant with an increased intramitochondrial CoA concentration
F. Escriva, P. Ferre, D. Robin, P. Robin, J.-F. Decaux and J. Girard 603–607

Indexed in *Current Contents*
